Volume 43

Marion, Crittenden County, Kentucky, Friday, March 11, 1921

No. 44

## BOND ISSUE CARRIED BY LARGE MAJORITY

The bond election held Saturday for the purpose of voting \$20,000.00 in bonds for the purpose of building a new High School for Marion carried by a vote of 517 to 119. It is gratifying to the Press to report the results of an election of this sort. The Press has always stood for better schools and for all other things which help to build up the town and county and surely there is nothing more constructive in its work than the school.

An unusually heavy vote was polled, practically all the voters of the town lining up on one side of the question or the other. Good work was done by the ladies of the School Improvement Club in helping to carry the election. Many have said since the election that if the contest had been a week farther off the vote would have been practically unanimous for the bond issue. For a number of days during the early part of the week there seemed to be a great deal of misunderstanding relative to the voting of the bonds but members of the board and others interested in the results of the election and in the building of a bigger and a better school for Marion took special pains to explain the points in question.

Precinct	Yes	No
No. 1	122	33
No. 2	92	19
No. 3	98	17
No. 4	133	34
No. 5	72	16

The School Board reports that they hope to be able to start work on the new building just as soon as possible. They have promised the people of Marion a new school building for the High School and knowing the Board as it does, the Press has no hesitancy in predicting that they will make their word good. The members of the new Board are Herbert Morris, E. G. Thompson, Hollis C. Franklin, Avis Stephens, C. W. Haynes and W. E. Cox.

## FARM AGENT APPOINTED

Fiscal Court and the officers of the County Farm Bureau met jointly on last Monday and appointed Mr. Jno. E. Spencer County Agent of this County. Mr. Spencer is a graduate of Illinois State University and has been employed as Assistant Farm Agent for the past year in Hart and Davies counties. Mr. Spencer is a native of Henry county, Illinois and is highly qualified for the position that he has been selected to fill.

He will begin his duties about March 15 and will in all probability be in the city on next County Court day. His office will be established later. Mr. Spencer was in Marion this week and reports that he intends to start his work with an earnestness and a zest that will necessarily bring results. He owns his own automobile and says that our former County Agent J. R. Byrd, has loaned him a horse to make his trips through the county.

It is certainly gratifying to learn that Crittenden county farmers have awakened to their need and that they are going after results. The advent of a Farm Agent marks a new era in the history of Crittenden county farming, and shows the progressive spirit that is beginning to manifest itself in our county.

## RESIDENCE TO BE ERECTED

Plans have been prepared by M. V. Arnold, Engineer, for a new residence for W. O. Tucker. This new home is to be erected on the corner lot adjoining M. H. Cannan's dwelling, which has been used in former years for the Chautauqua lot.

The new building will be of the semi-Bungalow style and will contain a living room, library, dining room, kitchen, breakfast room, pantry, four bed rooms, bath and sleeping porch. The house will have all the modern improvements and conveniences including both plumbing and heating systems.

Mr. Tucker, for whom the house is to be built is one of the firm of Foster & Tucker. Work will be started in the early months of this spring on the new residence. When completed it will be one of the most beautiful and complete dwellings in our city.

—Do you need a new maid to measure suit? See the M. H. Cannan Co.

## METHODIST REVIVAL

The meeting continues with unabated interest and large crowds attending. People from the rural districts come on horseback and in two and four horse wagons as well as in buggies and automobiles. Great numbers of people are being saved and uniting with the church. Several factors enter in to make the revival a success.

First, the plain speaking, simple preaching of the Gospel without any attempt for display and the meekness of the preacher appeal to the congregation.

Second, the music is unexcelled anywhere. Billy Yates of our own town knows how to lead and is one of the greatest singers of the day. Both the adult and the Junior choirs would be hard to beat anywhere. The orchestra adds greatly to the effectiveness of the choir. Miss Eva Yates and Mrs. W. O. Tucker preside at the pianos and Mr. O. E. Guess at the organ. Besides these are M. H. Cannan, cornet; Ted Boston, saxophone; Guy Lamb, tuba; W. O. Tucker, clarinet; H. Moore, trombone; W. D. Cannan, Geo. Orme, Miss Miriam Pierce, Mrs. E. A. Butler and Mrs. J. B. Wiggins, violins and Misses Laura Butler and Geneva Daniels and Mrs. Maurie Nunn, flutes.

Third, the courteous bunch of ushers, T. H. Cochran, A. Stephens, C. Grady, C. W. Lamb, H. C. Franklin, Maurie Nunn and Creed Taylor add much to the success of the meeting.

The constant personal work at the church, in the homes and in the streets by both men and women is a factor toward the success of the meeting. The way that members of the different churches work together is beautiful. A reporter said to Judge Carl Henderson one night that it was unusual to see circuit judges working to bring men to an Altar for prayer. He replied "If everybody got saved we would not need any Circuit Courts." Judge Henderson is an especially active worker.

Including both the Methodist and Baptist revivals there have been about 250 people united with the different churches in Marion.

## EYE TALKS

Susie E. Gilchrist, Oph. D.

The eye-ball is approximately spheroidal in shape, consisting of a large segment of a large sphere and a small segment of a small sphere. It is imbedded in a fatty substance called the optical fascia, which serves as a shock absorber. The eye is made up of three layers or coats. The outer layer, the sclera and cornea, is for protection of the delicate interior and to give shape to the globe. The middle coat or choroid is composed principally of blood vessels which nourish the whole eye. The inner coat, the retina, is mainly the termination of the optic nerve, which enters at the back of the eye, known as the blind spot, and branches out over the inner surface. As light travels in straight lines, one of the requisites of vision is refraction or the breaking of rays of light so that they may be brought to a focus upon the retina. For this purpose the eye has a cornea, two media which fill the anterior and posterior chambers of the eye and a lens which is constructed of concentric layers, like the layers of an onion, and is soft and adjustable to changes of the capsular surface, caused by contractions of the canal which surrounds it. The adjustment of this lens for far and near vision is called accommodation.

## GIRLS WANTED

We are now working about 150 girls and can use 50 or 75 more at once. The work is light, easy and very fascinating, and all girls like the work. We pay more than your expenses while learning, and after you have learned you will have a position you like, and pays well. The working conditions are splendid, and steady employment. If your family desire to move to Princeton we will procure a house for them. Write to PRINCETON HOSIERY MILLS, Inc., Princeton, Kentucky 2

The soil of Mississippi produces a better flavor in sweet potatoes than Kentucky soil. A trial will convince you, meet me in Marion March 14 and be convinced. J. Frank Conger.

## Do You Bank by Mail?

There are many of our customers whom we rarely ever see. Many of them we have never seen.

These customers make frequent deposits but send them by mail. They live many miles from Marion but Uncle Sam's postal service makes it convenient for them to bank with us.

If it is not convenient for you to come to town regularly, why not try banking by mail? You will be pleased with our service.

If you are in Marion Monday, County Court Day—or any other day, come in and SEE US.

## Farmers Bank & Trust Co.

Marion, Ky.

## MARION GIRL MAKES HIGH MARKS

Miss Mildred Summerville, daughter of Mr. and Mrs. J. R. Summerville of Depot Street has received very creditable marks on her studies at State University. Miss Summerville is taking eight subjects and during the first semester she made six A's and two B's. She has never fallen below B in any of her classes. She graduates this year.

## KILLED BY FALL FROM AUTOMOBILE

In attempting to jump on a moving automobile, Thomas Randolph Guess, a senior in Livingston county High School at Smithland was fatally injured Thursday afternoon. He died in about fifteen minutes after the accident as a result of concussion of the brain.

Young Guess had started to join a party of friends passing on the street and tried to jump on the running board of the car before it slowed down. He was thrown on his head striking the body of the car with great force. His skull was crushed and efforts of physicians to restore him to consciousness were unavailing.

He was the son of J. C. Guess, of Salem and was a popular member of the High School at Smithland. He was an active participant in student activities.

## RESIDENCE BURNS

The home of G. M. Travis, who lives near Marion, was burned Sunday morning about 11 o'clock while the family were visiting at the home of Josh McDonald nearby.

When the fire was discovered it was too late to check it. Everything was destroyed but two feather beds, some meat and canned fruit. It is reported that Mr. Travis had no insurance.

## MARRIED AT ROSICLARE

On Sunday night, February 27, Mr. Thomas L. Hughes and Miss Laura Hill both of Rosiclare were united in marriage. The ceremony took place in the Methodist parsonage parlor, by Rev. Page.

The bride is a charming young lady of Rosiclare and is loved by all for her sweet disposition.

The groom is a popular young man of splendid character and well known among his many friends of this county.

They will make their home at Rosiclare, where Mr. Hughes has been employed for some time.

## FALLING SCAFFOLD INJURES WORKMAN

Monday morning while working on the front of the D. O. Carnahan building Coleman Byford was severely injured by a falling scaffold. Mr. Byford was working under the platform with the intention of moving it when it fell on him. He sustained painful injuries but not serious. He was bruised on the shoulder and hip and cut about the face.

The building on which he was working was damaged during the recent fire and he with several other workmen were doing repair work. No one else was injured.

There has been quite a bit of repair work done already on the Carnahan building. It has been re-roofed and the walls that were damaged have been repaired. There remains yet a new front to be put on.

Mr. Carnahan also intends to paper and paint the offices in the second story of the building. This renovation will add greatly to the beauty of the building and make it one of the most desirable in our city.

## NOTICE TO FARM BUREAU MEMBERS

On Monday the 14th, County Court day, there will be a meeting of the Board of Directors of the Crittenden County Farm Bureau at the Court House. All members of the organization who care to be present are cordially invited to attend. Meeting called at 1:00 P. M.

## CALDWELL SPRINGS CLOSED

Friday, March 4, Caldwell Springs school closed a successful term with a large number of pupils and patrons present.

The afternoon was spent in spelling and arithmetic contests between pupils and patrons.

An interesting ball game was played by the boys and men, the boys winning.

The district is very anxious to secure another room to the building as the present one is entirely too small to fill the needs of the district.

Marion Brasher, Elmer Travis and Sylvia Lott received certificates of promotion to the High School.

## BAPTIST CHURCH

The congregation of the First Baptist church of this city has under consideration plans for the enlargement of the church and also to build or purchase a new Pastor's home.

Plans will soon be complete and the work is expected to start this spring.

## TRIP TO DAIRY BARN

The trip to Mr. Paris' had been planned since school began but the weather or some other hindrance had always prevented, and in spite of the clouds Thursday we did not put it off any longer. Two miles of walking on muddy roads through fields, up and down hills did not appeal to us much, but let me say that I have never been sorry I went.

He has by far the nicest dairy barn in the county. I have often driven along the road and wondered if the interior was as nice as the exterior, but after one glimpse I saw that it looked much better within than without. The first thing I noticed when I stepped in was the floor. Around the walls and down the center was smooth concrete about five feet wide, with a concrete litter trough on each side. All this including the trough was as clean as water could have made it. The lady of the house informed us before we went to see the barn that they were not expecting us and everything was awful dirty, but I haven't been able to see yet how it could have been cleaner. The floor of the stalls were of solid clay and bedded with clean straw, which showed that the herd enjoyed comfort as well as cleanliness. All the inner part was white-washed and ventilation was provided by a window for every two stations. There were twenty stations all inexpensive, yet as practical as could have been secured at any price, and a roomy private concrete trough for each stall, with deep sides so each cow got only her part and no more.

The silo was located at the upper end of the barn and contained several feet of sweet smelling silage. It had been filled with corn (Hastings Prolific), especially suited for silage, the entire silo, 10x24, being filled from 3½ acres. The truck was large, pivoted on one wheel so as to be easily turned and had the sides so constructed as to extend over the feed trough and prohibit all waste.

One end of the entire building was used for feed room and milk room. Both were ceiling and well lighted. The milk room was as clean as any dining room. It contained a well-stove, cream separator, milk cans, bottles, towels and other articles necessary about the dairy. On one side of it was a cellar or ice box, made of concrete just below the floor about 3x3x8, and an ideal place for keeping products on ice. The door of the cellar was easily raised by a weight. The feed room was well filled with bran, chops, and cottonseed meal. The ration then fed was three parts cottonseed meal five parts chopped corn, five parts wheat bran, with silage and good hay. But the feature of the lower floor that attracted most of us was the litter carrier. An overhead rack on both sides leads to the main track which passes through the calf shed to a concrete manure pit under cover. The litter carrier saved many times its cost in work the first winter, while the covered concrete manure pit cost but little and is an absolute necessity for greatest profit from dairying. Near the silo were broad steps leading into the loft. The barn was covered with a self supporting roof and furnished plenty of room for feed. A track and hay fork were used for storing the hay in the loft. It was about one half full at the time of our visit.

He has about 18 cows in the herd now, most of them Jerseys. He keeps several small calves to drink the skim milk. A good squirrel colored registered Jersey bull was in a separate barn in the lot.

The entire arrangement showed economy, sanitation, forethought and convenience. If other farmers of the county would follow his example the entire county would be greatly changed.

## AN AGRICULTURE STUDENT

### DAUGHTREY-WELDON

Mr. Jerry Daughtrey and Mrs. Florence Weldon were married at the residence of the bride Tuesday evening at 6 o'clock in the presence of a few relatives and friends. Rev. E. M. Eaton officiated. Both the bride and groom are residents of this city and have many friends who will extend congratulations.

## UNCLE SAM AND THE DISABLED SOLDIER

BY DR. FRANK CRAYNE

While there is so much criticism of the Government going on, and now that the war is over nobody seems to have a kind word for Uncle Sam, I would like to call attention to one really good and first class thing he is doing.

The Government has appropriated \$90,000,000 to help all those who have been incapacitated by the war to fit themselves for jobs.

That is quite a tidy sum. Do you know about it? Are you a disabled soldier, or do you know of one? If so, here is the chance to find out that the Country that asked men to fight for it is not altogether ungrateful.

Every week hundreds of service men are discharged as cured from the government hospitals and at the same time returned to civil status, but these young men in many cases are not physically and mentally able to take up their former vocation. The Federal Board for Vocational Education has \$90,000,000 at its disposal and is prepared to give training to any disabled exservice man honorably discharged since April 7, 1917, who is unable to carry on his former work without a real handicap and whose condition makes such training feasible. In this way the Government has provided a comparatively happy and independent future for such men.

The Government now pays men from \$80 to \$170 per month, according to a man's dependents and the cost of living in the locality in which he is trained. These men are trained at many of the best professional and trade schools in the country; others are trained on the job with some practical firm; still others prefer to keep their present positions and study in night courses without training pay in order to advance themselves.

If a man's eligibility can be established, he can be almost immediately enrolled in a school or placed in training with some firm.

Men from out of town will be furnished free railroad transportation upon request and given meals and lodging when necessary.

Lack of schooling does not make a man ineligible. The Board will endeavor to train the most illiterate foreigners. Many men think it is necessary for them to leave home towns in order to get training of any sort. As the Board places a great many men in "permanent training on the job" it is quite possible that a man can live at home while taking training.

If any man has a reason why he cannot accept vocational training at the hands of the Federal Board, he is urged to bring that reason to the attention of the Board. If he is right, his case will be retired to the Board's inactive files until he wishes to open it again. If he has been misinformed, the Board will set him right. The Board states it is continually running into men who do not know that they may be entitled, for instance, to compensation from the War Risk Insurance Bureau, and also to training under the Federal Board.

You may have heard exsoldiers or others say that the Government drafted them to fight, and now that it's all over, it casts them aside, and cares nothing for them.

If you have read what I have written here you know that is not so.

All you have to do is to write to the Federal Board for Vocational Education, Denton Building, Cincinnati, Ohio, and you will receive full information.

That does not mean you may have to come to Cincinnati. The Board has branches all over the country in almost every large city. But you can write to the Cincinnati office and find out.

If you are in any way disabled why not receive this help? You are entitled to it, and the Board is anxious to find you.

(Issued by the Federal Board for Vocational Education with special permission of The Associated Newspapers.)

Mr. C. C. Walker of the Deane-wood section announces in the Press this week as a candidate for jailer. "Fel," as he is known to his many friends has many qualifications that would make him a good official if he should win out in the election.

## CROSS LANES

Mrs. Nora O'Neal went to Sturgis one day last week.

Ina Henry and little daughter Georgia, visited her mother the week end.

Delpha McDowell has returned home.

Tom Manley is slowly improving.

Inez and Ruby Congo visited their uncle Mr. H. A. O'Neal one night, last week.

The party at Mr. Buck Nelson's Wednesday night was well attended and everyone reported a nice time.

Harold Rankin of Fords Ferry passed through here one day last week.

Mrs. Lucy Moore spent one night last week with her daughter Mrs. J. H. Thomas.

John A. Arfleck attended the party at Mr. Nelsons Wednesday night.

Geoble Williams was in Marion on business, Saturday.

H. P. Young was in Marion the last of the week.

John Will Scott has returned home.

Kittie Crisp has recently been visiting her brother Homer Crisp of Blackford.

Opal Moore visited Mrs. H. P. Young Wednesday.

Mr. and Mrs. Geo Roberts spent Sunday at the home of her parents Mr. and Mrs. A. R. Nunn.

Lyle Moore visited Winsford Nunn Sunday.

Miss Mary Hardin and Roy Newcom passed through here Sunday.

## ODESSA.

Mr. Delmer Travis spent Saturday with Mr. Allie McChesney.

Mr. and Mrs. Allie McNeely have left for Missouri, where they will spend a few months.

Mr. Burt Crider and family were guests of Will Tosh and family last Sunday.

Mr. Charlie Phillips is spending a few days with his cousin, George Tosh.

Mr. Kirby McChesney is improving very slowly at this writing.

Mr. Al Sullivan and family spent Sunday at the home of Will Tosh and family.

Mrs. Lizzie Casper spent Sunday evening at the home of I. W. Tosh.

Miss Celia Phillips is spending a few days with Mr. Will Tosh and family.

Miss Verda East and brother, George, spent Sunday with Mr. and Mrs. I. W. Tosh.

Miss Cora McChesney spent one night with Reba McConnell last week.

Miss Celia Phillips spent one evening last week with Reba McConnell.

Mr. Lonnie Sullivan spent Sunday with his uncle, K. Sullivan.

Mr. Bob Porter spent Sunday at the home of T. L. Hunt and family.

## FRANCES.

Fannie Campbell was the guest of her aunt, Hattie Shewcraft Monday night.

Mrs. Forrest Oliver of Frances is the guest of her daughter, Mrs. G. W. Miller this week.

Mrs. Nola Butler of Salem is visiting her mother, Mrs. G. W. Parish, this week.

Ruby Brasher and Elizabeth Teer visited Miss Vera Ralston Thursday night.

Mrs. M. F. Pogue returned home Wednesday from an extended visit in Louisville.

Mr. Robt. Pogue and his son, Vernon, are seriously ill at this writing.

Miss Martha and Nannie Belnear visited Mrs. E. Brown Thursday.

Mrs. Ada Campbell and Mrs. Ina Guess were guests of Mrs. J. R. Brown Wednesday.

Mr. Lawrence Shewcraft was the guest of Mr. J. R. Brown Friday.

## LEVIAS

Clarence Settles has gone into business at the L. L. Price store room at Levias. He has a new line of dry goods and groceries.

Misses Sallie Sullenger and Lenah Franklin were guests Sunday of Miss Mary Watson.

J. H. Price and wife and son, Rudell, spent Saturday and Sunday with Mrs. L. L. Price.

J. B. Carter, Jr. has rented a farm near Fords Ferry.

Mr. and Mrs. Hodge of Emmaus visited Friday with their son, Murray and wife.

Elmo Watson went to Evansville last Wednesday.

Mr. Frank Loveless was buried at Union Cemetery last Friday.

Mr. and Mrs. Will Todd of Sheridan were week end guests of her sister, Mrs. Kelly LaRue.

Collin Franklin, wife and son spent last Sunday with his mother, Mrs. Dean Franklin.

Mrs. Maude Love and Sallie Sullenger visited last Thursday with Mrs. Zula Summers.

Ada Perryman and children were guests Saturday and Sunday of her mother, Mrs. Martha Franklin, near Siloam.

James Minner of Cedar Grove visited Saturday night and Sunday at the home of Mrs. L. L. Price.

Claud Mahan visited the week end with his aunt, Martha, Barnes and cousin, Pearl Carter.

Grace Minner is the guest of her Grandmother Price this week.

Curtiss Franklin returned from the Navy with an honorable discharge.

Miss Maoma Norris spent one day last week with Miss Mary Watson.

Misses Sallie Sullenger, Mary Watson and Lenah Franklin spent Monday with Florence Price.

Mrs. P. G. Gillis visited recently with her cousin, J. H. Price and family.

Miss Imogene Beard gave a party Saturday night in honor of her house guest, Miss LaVerne Farris, of Salem.

Mr. and Mrs. J. B. Carter spent Sunday the guests of her nephew, Fred Love and family.

Miss Mary Watson was a recent guest of Sallie Sullenger.

Mr. Ernest Taylor and wife were guests the week end of her mother, Mrs. Maggie Love, near Siloam.

Born to Mr. and Mrs. Lee Loftess a babe that only lived a few hours. It was buried at Union Thursday.

## SULLIVAN

Mr. and Mrs. R. Hammack went to Sturgis Sunday.

Mr. E. Bolger of Illinois was here a few days this week.

Miss Marie Hammack went to Sturgis Sunday.

Messrs. Doris Hick and Willis Long of Dekoven were here Sunday.

Miss Marjorie Burklow was here Sunday.

Mr. and Mrs. Freeman Crider spent the day in Sullivan Saturday.

Mr. and Mrs. Will Onon, of Sturgis were the guests of Will Quirey and family Sunday.

Mr. and Mrs. B. Brinkley were here Sunday.

## CRIDER

Mr. Glenn Orr and Miss Ora Hilliard passed through this place Sunday.

Miss Reba and Ora Turley spent Saturday night and Sunday with Miss Ila Stenbridge.

Mr. Robt. Porter visited Miss Lillian Travis Sunday.

Mr. Hubert Hillyard and Miss Anna Orr went to the musical Saturday night.

Mr. Glenn Orr and Burnett Turley went to Hillsdale Sunday.

## DAIRY HINTS

### PREVENT DISEASE OF CALF

Improper Feeding or Insanitary Conditions or Both Are Cause of Many Ailments.

(Prepared by the United States Department of Agriculture.)

Most calf ailments are due to improper feeding or insanitary conditions, or both. Keep the calf out of cold rains in winter as much as possible and provide a dry, well-bedded stall at night.

Provide Nature's tonics—exercise, sunshine, pure air, abundance of fresh water and a variety of feeds—and

It is Easier to Prevent Calf Disorders Than to Cure Them.

there will be little need for medical attention. It is better to prevent the occurrence of disease than to be under the necessity of curing it afterward.

Observe the calf at all times. If it should appear drowsy, feverish, stiff, or sluggish, act quickly. Reduce feed at once, and the disorder may be in large measure prevented. Keep salt before the calf at all times. An abundant supply of fresh water should be available always.

Some of the commoner ailments can be treated by following instructions which are contained in various bulletins and publications of the United States Department of Agriculture. In case of serious illness, consult a competent veterinarian at once. Do not delay.

### STERILIZING MILK BOTTLES

Highly Important From Health Point of View That Containers Be Thoroughly Cleaned.

(Prepared by the United States Department of Agriculture.)

Too much emphasis can not be given to the fact that only thorough washing, steaming and drying produces a sterile container for milk and that milk should not be allowed in any other than a sterile container at any time, and particularly if the milk has been pasteurized or otherwise heated.

The washing and sterilizing of returned empty milk bottles is a city milk plant constitutes a big problem. Bottles are received in varying conditions of cleanliness and from the many and varied sources of collection, and it becomes somewhat of an accomplishment to make them sterile containers for milk.

The inoculation from the empty bottle can be reduced to a minimum by thorough washing, steaming and draining, and as this is possible and highly important from a health point of view no other method should be tolerated.

Placing pasteurized milk in a bottle which has not been sterilized just previously lessens the efficiency of the pasteurizing process and helps to defeat its purposes.

### COMFORT OF COW IMPORTANT

Roominess, Cleanliness, Sunlight, Fresh Air and Proper Feed Are Some of Essentials.

Of importance is the comfort of the cow. This is often the only reason for constructing a barn, notwithstanding the fact that there are other considerations. The comfort of the cow requires roominess, cleanliness, sunlight, fresh air and feed. The barn with a wing extending to the southward providing two rows of stalls and with windows in either side is a type still very much in favor and has much to commend it. In this style of barn it is easy to adhere to the modern standard of "six square feet of glass per cow." This may appear to be a large proportion of glass, yet it is none too much.

### STRIVE FOR SANITARY MILK

Farmer Must Realize That Cows Should Be Kept Out of Mud—Good Drainage Will Help.

If wholesome and sanitary milk and cream are to be produced the farmer should realize that the cows should be kept out of the mud as much as possible. Conditions in and around the barn can in many cases be greatly improved by draining and grading.

### MILK AND CREAM IN WINTER

Precautions Must Be Exercised in Cool Weather if First-Grade Product is to Be Delivered.

Cooler weather should not mean less care in the handling of milk and cream. Even though the weather is cooler, summer precautions are necessary if a first-grade product is to be delivered.

## POULTRY CACKLES

### BULLETINS AID WITH FOWLS

Noteworthy Success of District of Columbia Woman With Small Flock Attributed to Study.

(Prepared by the United States Department of Agriculture.)

One hen, a brood of 12 chickens, and a few farmers' bulletins on poultry raising were the foundation on which Mrs. M. Lohrborg, a resident of the District of Columbia, began her poultry operations in the spring of 1919. During the first 11 months of 1920 her flock of eight birds—the hen and seven pullets—laid 1,059 eggs, an average of about 132. During the same period she hatched from three settings of eggs 30 chickens, of which she raised 26.

The noteworthy success with poultry

Purebred Rhode Island Red Cockerel.

try, came to the attention of the United States Department of Agriculture recently, when Mrs. Lohrborg called for an additional supply of farmers' bulletins, explaining that owing to her success her neighbors had borrowed the bulletins which she had formerly obtained.

"I never kept any chickens before," she said, "and knew nothing about poultry raising until I got the first brood and also the bulletins."

Her chickens are Rhode Island Reds from good stock, and a standard-bred rooster is used. The flock is kept entirely under back-yard conditions in a space 30 by 50 feet, and the feed, costing about \$1 a week, is supplemented by table scrapes. Based on retail prices, the estimated value of the 88 dozen eggs laid by this back-yard flock was about \$62, but none were sold. A fondness for fresh eggs prompted the family to keep every one for family use. In addition, fried chicken and roast fowl graced the table frequently.

Acting on suggestions in Department of Agriculture literature, she is planning to "put down" in water-glass solution a good supply of eggs next season. Her poultry house is small, but scrupulous care in cleaning it out every day, combined with close personal attention to good feeding is responsible, she believes, for the absence of poultry diseases and ailments.

### SANITARY HOUSES FOR HENS

To Secure Adequate Returns in Eggs and Growth Buildings Must Be Light and Ventilated.

Chickens will not give adequate returns in eggs or growth when kept under insanitary conditions, say specialists of the United States Department of Agriculture. The construction of the poultry house should receive first attention. Sufficient air space, lighting and ventilation should be provided, and the entire house cleaned at frequent intervals.

While these precautions cannot be depended upon to control mites and lice, they aid the poultryman in determining when these pests are present. Furthermore, the fowls are kept in vigorous condition, which in itself aids in controlling pests. Dirty and insanitary houses provide ideal breeding conditions for insects and germs which are detrimental to poultry. Diseased fowls or those with malformed bills or feet, fall ready prey to lice, mites and other insect pests, and should be removed as soon as discovered.

### DON'T FORCE BREEDING HENS

If Strong Healthy Chicks Are Desired Fowls Must Be Kept in Good Condition in Winter.

Many a breeder has fallen into the pit of forcing his brooders for winter eggs and then wonders how it is that the eggs don't hatch well in the spring. If you want strong healthy chicks and big hatches you will do well to keep your hens in good condition but not force them for heavy egg production.

### ESSENTIALS OF EGG MAKING

Sprouted Oats or Steamed Clover and Meat Scrap Take Place of Bugs and Grass.

Laying hens need the elements of egg making that are found so freely in their summer range—meat and grass. Both are vitally necessary to making hens lay, and can be supplied with but little trouble. In the form of meat scrap, and sprouted oats or steamed clover.

Jud Tunkins.  
Jud Tunkins says some of the people who founded free libraries could have made a much bigger hit with the populace by founding free motion picture exhibitions.

We Had Forgotten.  
Of course it is some trouble to clean a spark plug, but do you remember what a task it was to go over an entire horse with a brush and curry comb?—Dallas News.

## PINEY CREEK

Mrs. Leta Woodall and children visited Mr. Cam Crayne and family Sunday.

Mr. John Hunt and wife visited Mr. and Mrs. John Sigler Sunday.

Mr. James Cannan is reported no better at this writing.

Rev. Vaughn filled his regular appointment at this place Saturday and Sunday.

Miss Margie Belt visited Mrs. Jewell Jennings Sunday.

Miss Hilda Crayne spent the week end with Mr. Cam Crayne.

Misses Alma and Elda Elkins were the guests of Misses Lee and Macy Rushing.

Mr. and Mrs. Huley Guess and little son spent Sunday with Mr. and Mrs. James Hugg.

Mrs. Martha Sigler and daughter, Stella, and Hester Hunt were the guests of Mr. John Sigler and family one day last week.

Mr. Will Rice and family were guests of Mr. J. I. Cannan one night last week.

Mr. C. Woodall wife and children, and Mr. and Mrs. John Rushing spent Sunday at the home of Mr. and Mrs. Gilbert Campbell Sunday.

## BAD BACK TO-DAY?

Backache is usually kidneyache and makes you dull, nervous and tired. Use Doan's Kidney Pills for weak kidneys—the remedy recommended by your friends and neighbors. Ask your neighbor.

J. W. Blair, carpenter, 229 E. Depot St., Marion, says: "For a long time I had a great deal of trouble with my back, especially in cold weather. My kidneys were weak and I was obliged to get up frequently during the night to pass the secretions. I had severe pains in my back just over my kidneys. I had lameness through my sides, too. When I have these attacks I get Doan's Kidney Pills at Orme's Drug Store and they soon free me from the trouble. Doan's Kidney Pills always give quick relief and I believe they are the best kidney remedy one can use."

Price 60c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Blair had. Foster-Milburn Co., Mfrs., Buffalo, N. Y. (Advertisement)

## DAIRY

### HANDY GATE FOR DEHORNING

Heider Rigged Up Leaving Sufficient Space for Animal's Head Is Easily Constructed.

A lock gate for catching and holding cows while they are being dehorned and marked, is simple in construction.

First make a gateway in the lot fence, using not less than 4-inch material for the gateposts. Now nail a 6-inch board on each side of these posts, across the gate at the ground, and also two others across at the top of the posts. Close up half of the opening by nailing boards diagonally to the boards at top and bottom of the posts, as illustrated. Get a strong pole, about 4 inches in diameter and 12 feet long. Bore a hole through its large end with a 1-inch auger; also bore through the bottom boards, about 8 or 10 inches from the post at the open side of the gate. Let the pole down between the top boards and the bottom ones, and insert a 1-inch rod through the bottom boards and the pole. Then tie a 1-inch rope to the top end of the pole.

When ready to dehorn or mark a large strong animal, drive her toward the gate. Just as she passes her head by the pole, pull it over against her neck, and she is easily held. There

A Gate, Rigged Up So as to Leave Only an Opening Big Enough for the Animal's Head, Is Useful When the Animal Is to Be Marked or Dehorned.

Is no danger of her doing damage with her horns, for she cannot move her head.—Popular Mechanics Magazine.

## DISEASE CAUSE OF ANIMAL LOSS

Three-Fourths of Ailments Which Ruin Valuable Herds Can Be Prevented.

### STRICT SANITATION NEEDED

Contagious Maladies, Sporadic Ailments, Parasitic Troubles, Accidents and Neglect Are All Quite Disastrous.

(Prepared by the United States Department of Agriculture.)

Every year the people of the United States lose over \$200,000,000 directly (and no one knows how much indirectly) through diseases of farm animals. This is a large toll when divided on a per capita basis, and when it comes home to the farm stock-raiser who finds a valuable animal dead in the barn, or an epidemic spreading into his herd, the loss is sometimes disastrous. The most regrettable feature of the case is that probably three-fourths of the loss could be prevented.

#### Five Causes of Disease.

There are five principal causes of disease and death of farm animals—contagious diseases, sporadic disease, parasitic troubles, accidents and neglect. Contagious diseases can be avoided, or at least their consequences greatly diminished, if farmers will learn to co-operate with the United States Department of Agriculture and the various state livestock and sanitary authorities, who are striving to maintain animal health. Farmers should report promptly to the nearest officials any suspicion of the presence of contagious disease, and they should observe carefully all regulations in regard to quarantine, sanitation, and care of animals, as protection against contagion.

Tuberculosis is one of the worst scourges among animals and it thrives best in damp, dark, ill-ventilated stables. It is less common among animals running at large. Light, dry, well-ventilated stables and dry, clean barnyards or paddocks are essential to the health of farm animals. One valuable point in combating contagious diseases, especially tuberculosis, is to start the herd with animals that are not only free from disease, but are of

Proper Care Keeps Farm Animals Healthy.

stock that is not predisposed to disease. Official tests of herds are made on request and through co-operation of the United States Department of Agriculture with livestock sanitary officials. Purchase of breeding stock from these herds is a wise precaution. Care should also be taken to obtain stock adapted to climatic and local conditions. The other sources of animal loss are largely a matter of intelligent and careful handling.

Sporadic and incidental diseases, such as disorders of the digestive and respiratory tracts, can be avoided largely by proper handling and feeding. A proper balancing of rations has a material influence on the health of live stock. Too much of any food element is likely to result in digestive disorders, thus predisposing the animal to disease.

Parasitic diseases also carry off large numbers of valuable animals every year. They are largely the result of improper housing and neglect. The average farmer can not be expected to have the time and aptitude for study which will keep him abreast with the latest developments in feeds and feeding, animal nutrition and medicines, hygiene, and other important matters related to the stock-raising industry. He can, however, avail himself of the benefit of the studies and demonstrations of specialists who have devoted their entire time to these subjects. Every state agricultural college maintains a corps of specialists whose publications and services are available.

#### Department Offers Aid.

The department of agriculture is constantly giving out important information in books and bulletins which may be had on request and in every state the department has representatives combating animal diseases. It is well to consult a local veterinarian in case of any disturbing symptoms and to report to the state veterinarian or the United States department of Agriculture, any symptoms which indicate the possibility of an epidemic. The wise breeder is ever on the lookout to prevent disease instead of waiting until a cure is necessary.

## POULTRY FLOCKS

### BEST BREED FOR CAPONIZING

Rocks, Brahmas, Cochins, Langshans and Wyandottes Are Favored by Different Producers.

(Prepared by the United States Department of Agriculture.)

In selecting the breed best suited for caponizing, several factors must be taken into consideration, say poultry specialists of the United States Department of Agriculture. Large capons bring the best prices. Consequently the breed should be large. It does not pay to caponize small fowls. Yellow legs and skin, as in other classes of poultry, are most popular. Plymouth Rocks, Light Brahmas, Cochins, Cornish, Langshans and Wyandottes are all recommended by different producers, as are also various

Performing the Operation.

crosses of these. Orpingtons also make fine capons, but the white legs and skin are somewhat of a disadvantage in this country.

Brahmas and Cochins possess good size. Some breeders claim that Brahmas are difficult to operate upon; others deny this. Plymouth Rocks and Wyandottes are somewhat smaller, but sell readily and possess the advantage of yellow skin and legs. The Langshan is large and is easily operated upon. The Cornish is probably most useful as a cross with some of the other breeds, thereby improving the breast meat without materially reducing the size of the fowl.

In Massachusetts the Brahma was formerly the most popular breed because of the demand for large birds for roasters. Later, crosses between the Light Brahma and the Barred or White Plymouth Rock became quite popular, while at present pure Barred and White Plymouth Rocks are perhaps most widely used.

### WHEN FOWLS' COMBS FREEZE

Best Remedy Is Mixture of Lard, Quinine and Kerosene, Melted and Mixed Together.

Even in cold weather fowls should have good ventilation and fresh air, and this sometimes leads to frostbitten combs and wattles. These are not particularly serious if looked after properly, but if neglected may ruin the fowl's appearance, as well as cause unnecessary suffering.

Breeds with large combs need especially good attention. The best cure is to apply an ointment made of lard two ounces, quinine one ounce and kerosene three ounces, melted together and thoroughly mixed. The ointment should be rubbed gently on the affected parts once daily for several weeks, or until the parts become normal.

### DISTRIBUTE BUILDING COSTS

Proper Share of Expense for Replacing Old Buildings Should Be Charged to Income.

A proper share of the cost for replacing old farm buildings should be charged against the farm income each year. Buildings may be constructed to last for 100 years, or they may stand only a third of that time. If the cost of replacement is not charged into the yearly accounts the whole bill will appear against the income for a single year. Depreciation charges for buildings, machinery, or other farm equipment are merely a method for distributing these costs over the period of years in which the equipment is in actual use.

### DETAILS OF NONLAYING HEN

Knowledge of Little Points Not Absolutely Necessary for Profitable Job of Culling.

While there are many little details connected with the build and form of the nonlaying hen that are well worth knowing, many of which require some study and practice, a knowledge of these details is not absolutely necessary for a fairly good and paying job of culling the farm flock.

### ROUP IS MOST DESTRUCTIVE

Disease Is Usually Caused by Drafts in Poultry House and by Lack of Fresh Air.

Roup, one of the most disastrous diseases the poultryman has to combat, is usually caused by drafts in the henhouse and lack of pure air. Every crack should be closed, if it allows the air to blow over the roosts. Also an opening near the top should be provided, so that the impure air may escape.

## SUMMER ANNUALS ARE MUCH ALIKE

Cowpeas, Soy Beans and Velvet Beans Have About Same Climatic Adaptations.

### COMPARISON MADE OF CROPS

Among Important Points in Determining Value of Legume Are Its Value for Forage and Its Ability to Supply Nitrogen.

(Prepared by the United States Department of Agriculture.)

Cowpeas, velvet beans and soy beans are all summer annuals, agriculturally much alike, and for the best results are adapted to nearly the same regions. A comparison of these crops is not so much a matter of determining which is the best crop as it is a careful consideration of their climatic and soil adaptations and the special uses of each on the farm. Among the important points that determine the value of a leguminous crop are its value for forage, both in quantity and quality either as hay or pasture; its ability to supply additional nitrogen; and the value of the seed as a cash crop or for its utilization on the farm.

The soy bean has about the same climatic adaptations as corn, and therefore its culture is much more extended than that of either the cowpea

Cowpeas and Johnson Grass.

or velvet bean. The velvet bean is especially adapted to the well-drained portions of the Atlantic and gulf coastal plain areas, while the cowpea can be grown successfully not only there, but throughout the cotton belt and the lower half of the corn belt. The velvet bean and cowpea are quite sensitive to cold, whereas the soy bean withstands considerable frost in spring and fall. Cowpeas and velvet beans both succeed on poor soils better than the soy bean. For soil improvement the velvet bean is, in general, superior to either the cowpea or the soy bean, although the cowpea succeeds under a greater diversity of conditions.

The soy bean is to be preferred for forage purposes on account of its upright growth. The cowpea and velvet bean are viny plants and therefore more difficult to harvest and cure.

As a grazing crop for cattle and hogs in fall and winter the velvet bean cannot be excelled. However, the cowpea and soy bean can be grown over a more extended area, and some of their numerous varieties furnish earlier pasture.

For the production of seed, the soy bean has many advantages over the cowpea and velvet bean. The soy bean matures all its seed at one time and can easily be handled by machinery. Hand picking is most commonly practiced in gathering cowpea seed, although machinery can be used to advantage. It is necessary to pick velvet beans by hand because of the abundant, tangled mass of vines.

The seeds of velvet beans, cowpeas, and soy beans are all excellent feed for cattle and hogs. Cowpea seed, however, is rarely cheap enough for feed, but it is extensively used, especially in the Southern states, for human food. Soy-bean seed, in addition to its value for feed, is valuable for the production of oil and meal, and its use for human food is increasing.

The cowpea will undoubtedly continue to be one of the most important leguminous crops in the Southern states. No other crop sown under such a diversity of conditions or receiving so little attention in soil preparation and cultivation succeeds so well. Under the most varied conditions forage, soil improvement and human food are obtained.

### ATTENTION TO WORK HORSES

High Prices Asked for Animals Make It Necessary for Farmer to Get More Service.

The time has come when the life and usefulness of the work horse must have more attention. The high prices asked for horses of good size and ample form make it necessary for farmers to get more and better service from their teams.

## Cox's Restaurant

First Door So. of Farmers Bank & Trust Co. MARION, KY.

will be a mighty good place to eat

## Your County Court Day Dinner

GOOD MEALS—Reasonable Prices.

We want to please you.

We think we can save you money on Groceries.

Come and see if it isn't true.

YOU certainly want to save money, and you would like to have better bakings. Then use Calumet. It's the biggest thing you can do to improve the quality of your bakings—and lower baking costs.

Calumet is made in the largest, most sanitary Baking Powder Factory in the World. No Baking Powder is made under better conditions—none can be better in quality.

It contains only such ingredients as have been officially endorsed by the U. S. Pure Food Authorities. An absolute guarantee that it is pure.

RAISES THE QUALITY—LOWERS THE COST OF ALL BAKINGS

It received highest Awards, World's Pure Food Exposition, Chicago—Paris Exposition, Paris, France—positive proof of its superiority.

It is used by more housewives and domestic scientists than any other brand.

It is sold at a moderate price. All you have to do is to compare costs to determine how much you can save by buying Calumet.

Gluten is the muscle building part of flour which is of great importance. To be sure you get it in your bakings use plain flour and good baking powder, (not self-rising flour).

Calumet Cream Cake Recipe  
—3 cups pastry flour, 3 level teaspoons Calumet Baking Powder, 1/2 cup butter, 1/2 cup granulated sugar, 1/2 cup cold water, 1/2 cup white sugar, 1/2 cup extract. Toss and in the regular way.

### BELMONT

Mr. Ed. Stone and Grace Lemon visited at Jessie McMillan Sunday.

Porter Leneave and wife were the guests of her sister, Mrs. John McConnell Sunday.

Mrs. Emerson Ethridge is on the sick list.

E. Asher and wife visited at her father's, Elvin Andrews the week end.

Tom Asher and wife spent the week end at her father's, M. Ethridge.

John McConnell went to Marion Monday.

Jack Lowery of Blackburn was in our midst Monday.

Herbert Guess and wife visited J. McMickan and wife Sunday.

Mrs. John McConnell and children were guests of Mrs. Elsie Guess Saturday.

Miss Ora Andrews was the guest of her sister, Miss Geneva Asher Friday.

Mr. Emmaus Asher and wife will move to Bark Crider's place soon.

Mr. Garret Boyd and family visited his father, Frank Boyd, of Shady Grove, Sunday.

Huley Guess and family visited at the home of James Bugg Sunday.

Mr. and Mrs. Garrett Boyd spent Saturday night and Sunday with Mr. and Mrs. Frank Boyd.

Miss Lola Brown spent Saturday with Miss Reba McMillan.

Messrs Eria and Willis Crider spent Sunday with Mr. Hubert James.

Mr. and Mrs. Herbert Guess spent

Sunday with Mr. and Mrs. Jessie McMillan.

Mrs. John McConnell spent Saturday with Mrs. Elsie Guess.

Miss Ruby McConnell spent Saturday afternoon with Miss Yillie Guess.

Mr. and Mrs. Porter Leneave spent Sunday with her sister, Mrs. John McConnell.

### PINEY FORK

Mr. Emmaus Asher and wife were guests of Elvin Andrews Saturday.

Mrs. Gertrude Crayne spent Saturday the guest of Alford James in Marion.

Mr. Bob Watson of near Fredonia was in our midst one day this week.

Little Miss Christine Watson is spending this week with Gay Crider and wife.

Miss Ora Andrews visited Emmaus Asher and family one day last week.

Virgil Alexander spent Sunday with friends near Fredonia.

Rev. C. T. Boucher went to Marion Monday.

O. Chandler of near Pleasant Hill passed through here Monday.

## FOR STATE SENATOR.

We are authorized to announce  
H. F. GREEN  
of Livingston county as a candidate  
for State Senator subject to the ac-  
tion of the Democratic Primary Aug.  
6, 1921.

## FOR REPRESENTATIVE.

We are authorized to announce  
LESLIE McDONALD  
as a candidate for Representative of  
Livingston and Crittenden counties,  
subject to the action of the Repub-  
lican primary, August 6, 1921.

We are authorized to announce  
R. E. WILBORN  
of Crittenden county, as a candidate  
for re-election as Representative,  
Fifth District, composed of Critten-  
den and Livingston counties, subject  
to the action of the Republican pri-  
mary election, Saturday, Aug. 6, 1921.

## FOR COUNTY JUDGE

We are authorized to announce  
D. A. LOWRY  
as a candidate for County Judge of  
Crittenden County, subject to the  
action of the Republican Primary  
election, Saturday, August 6, 1921.

## FOR COUNTY COURT CLERK

We are authorized to announce  
L. E. GUESS  
as a candidate for re-election to the  
office of County Court Clerk subject  
to the action of the Republican Pri-  
mary, Aug. 6, 1921.

## FOR SHERIFF.

We are authorized to announce  
GEORGE H. MANLEY  
as a candidate for Sheriff of Critten-  
den county, subject to the action of  
the Republican primary election, Sat-  
urday, Aug. 6, 1921.

We are authorized to announce  
R. C. McMASTER  
as a candidate for Sheriff of Critten-  
den county, subject to the action of  
the Republican primary election, Sat-  
urday, August 6, 1921.

## FOR TAX COMMISSIONER

We are authorized to announce  
J. J. JAMES  
as a candidate for County Tax Com-  
missioner of Crittenden county, sub-  
ject to the action of the Republican  
primary election, Saturday, August  
6, 1921.

We are authorized to announce  
ISAAC M. DILLARD  
as a candidate for County Tax Com-  
missioner of Crittenden county, sub-  
ject to the action of the Republican  
Primary on August 6, 1921.

C. C. WALKER  
as a candidate for Jailer of Critten-  
den county subject to the action of  
the Republican Primary election,  
Saturday, August 6, 1921.

## For Commonwealth Attorney

We are authorized to announce  
T. C. BENNETT  
of Marion, Crittenden county, as a  
candidate for Commonwealth At-  
torney, Fourth Judicial District, sub-  
ject to the action of the Democratic  
primary election August 6, 1921.

S. T. Stull of Frederick, Md., has  
a small portion of fruit cake that was  
baked by his wife in 1872.

## NEWS IN BRIEF

Yeggs effected an entrance into  
the Post Office at Paris, Ky., and  
dynamited the safe, taking between  
ten and fifteen thousand dollars in  
postage and war saving stamps. The  
robbery was first noticed by the jan-  
itor when he arrived at daylight to  
fire the furnace.

The two white men implicated in  
the bootlegging escaped at Sturgis-  
were caught at Clinton, Ind., and  
placed under arrest. Deputy Sher-  
iff A. H. Perkins brought them  
back to Morganfield.

In a recent election in Union county  
the commission form of govern-  
ment was defeated by a vote of 928  
to 291.

W. J. Myers, former resident of  
Fredonia, Ky., and now a banker of  
Harrison, Ark., who shot and killed  
Henry Starr, the last of the Okla-  
homa bandits, says that he is sorry  
the bullet was fatal. Starr and  
three others were attempting to rob  
Myers' bank.

The electrical storm last week  
caused severe damage in Hardin  
county. The barn of Joe Martin was  
struck by lightning and two mules,  
a horse and eleven sheep were burned  
to death.

A National Guard Company is be-  
ing formed at Elizabethtown, Ky.  
Already 35 signers have been gain-  
ed.

President Harding was the fourth  
President to be inaugurated on Fri-  
day.

In setting out a shipment of trees  
received from France, growers in  
Salt Lake City, Utah, discovered bits  
of bone, leather, buttons, and cloth in  
the roots of the trees. The trees  
were evidently grown on the battle  
fields of France after the war.

P. B. Claxton, Federal Commis-  
sioner of Education said in a recent  
report that whipping of children is  
likely to indicate weakness in the  
teacher. He further stated that a  
person not able to run a school with-  
out corporal punishment was not  
competent to teach.

There are approximately 75,000  
union men in Kentucky at this time,  
according to the secretary of the  
Kentucky State Federation of Labor.

The five year old son of Mr. and  
Mrs. Herman Khun, of Kuttawa, is  
in a serious condition due to being  
pinioned under a tombstone which  
fell on him while playing in the cem-  
etery. He and another child were  
together when the accident occurred.

## MATTHEWS-HILL

Mr. Coy Hill, of Marion and Miss  
Virgil Matthews of Frances were  
married by Rev. Meroney Saturday  
afternoon.

Mr. Hill is the son of C. L. Hill  
of this place and is in the timber  
business with his father.

The bride is a daughter of J. T.  
Matthews of Frances and is a beau-  
tiful young lady. They both have  
many friends who wish them a long  
and happy voyage through life.

## CARD OF THANKS

We wish in this simple way to  
express our most sincere thanks for  
all the kindness shown us during our  
misfortune brought about by the  
burning of our home Dec. 27. We  
will always be deeply indebted to  
the local Baptist church and the  
christian friends in general who have  
helped either by gifts or sympathy.  
L. E. VAUGHN AND FAMILY

## FREEDOM

Misses Daisy and Margaret Wing  
visited Mrs. Roma Brown Saturday  
and Sunday.

Miss Lee Craghead visited Mrs.  
Brown this week.

Mr. Robt. Nesbit and son, Ellis,  
and Tom McEwen and son, Luther,  
and Mr. R. D. and Sylvan Fritts  
went to Sunday school at Marion  
Sunday.

Misses Eva and Lorine Fritts vis-  
ited Misses Rena and Lela Craghead  
Friday.

Mr. and Mrs. Robt. McEwen and  
Mr. and Mrs. Rufus Brown and  
daughter and Miss Ida Brown visited  
Mr. and Mrs. Tom McEwen Friday.

## Value of Ten of Gold.

The mint value of gold does not  
vary, but remains constant at  
\$20.67183462 per troy ounce, or  
\$18.54151 avoirdupois. Basing a cal-  
culation upon this value, a ton of gold  
would be equivalent to \$902,328.

we are notified otherwise.

Great Russian Port.  
The harbor of Odessa, in south Rus-  
sia, is formed by several stone piers  
and a long breakwater and is protect-  
ed in every direction. It is the only  
port in southern Russia where ships  
drawing 30 feet can come directly to  
the docks, and the docks are large  
and better equipped than those of any  
other Black sea port. The depth is 32  
feet on one side and 13 to 17 feet on  
the other.

## QUALITY OF HEN FLOCK VASTLY IMPROVED BY USING TRAP NEST

Three-Compartment Trap Nest Is Not Difficult to Make.

(Prepared by the United States Department of Agriculture.)

The most prepossessing hen is not always the most industrious layer. She may be the loudest cackler, but if her owner uses trap nests she cannot fool him. He can check up on results. The trap nest is so arranged that when the hen enters she is confined until released by the attendant. Specialists of the United States Department of Agriculture say that trap nests may be used to advantage by the best breeders of hens. It adds mechanical precision to judgment and experience in developing the flock and maintaining it at a high standard of egg production. It tames the birds and tends to stimulate laying. It furnishes definite knowledge of the traits and habits of each hen.

Details of Construction of Trap Nest.

Its of each hen. It furnishes the most satisfactory basis for breeding, and it eliminates the nonproductive hen.

### Careful Observation Needed.

In flocks of 50 or more, a three-compartment trap nest should be provided for every ten hens. In smaller flocks, a slightly larger proportion of nests is needed. Numbered bands are placed on the legs of the hens and a record is kept of their egg production. Frequent visits to the nests are necessary, especially when the hens are laying freely and during warm weather. There should never be less than three visits a day, and four or five would be better.

The trap nest may be placed on the walls of the pen or attached to the underside of the dropping board. If the latter course is taken, the front of the nest should face the pen. The rear may be made of wire to allow good ventilation. The dropping board will

serve as a top. If the nest is placed on the wall, slats or wire at a sharp angle should extend from the front of the nest to the wall to prevent hens from roosting on the top.

The trap nest is so constructed that, when the hen enters, her back raises the door. This releases the catch or trigger and allows the door to close. The catch, regulated by a screw or nail at the lower inside edge, should be set so that it just holds the door. It should have a washer on the screw to prevent sticking, and a guard to keep away the nesting material. A variation may be made for large or small hens by shortening or lengthening the catch which supports the door or by adjusting the size of the triangular notch in the door itself.

The following directions are given by the department's poultry specialists for constructing a three-compartment trap nest:

Cut four 1/2-inch boards for ends and partitions, 12 inches wide by 19 inches long; enough 1/2-inch boards, 30 1/2 inches long, laid lengthwise, to cover the top, back and bottom; and one strip, 30 1/2 inches long and 1 1/2 inches wide, for the front of the nests. Cut three pieces of 1/2-inch boards, 12 inches long and 3 inches high, to hold the nesting material away from the door.

Nail the top, back and bottom to the ends and partitions. Insert the 3-inch strips in the nests, and make the guard, nailing it to the left side of the nest. Bore a hole in the catch large enough that the catch will move freely when screwed into position on the side. Place a washer on the screw between the catch and the side of the nest. Insert a screw at the lower edge of the catch to stop it when set, so that the catch will just hold the door.

### Build Seven-Eighths-Inch Doors.

Make the doors of 7/8-inch material, 12 inches by 6 inches, and cut a triangular notch in the center, 4 inches wide at the bottom. Put two screw eyes in the top of the doors and bore holes in the front of the nests, 2 inches below the top (inside measurement), through which a 3/16-inch wire is run to support the doors.

Attach to the front of the nests a narrow strip upon which the hens can jump. Place a button or block of wood on the front of each partition to hold the door when the nest is closed.

If the nests are to be placed directly below the dropping board, a wire top should be used with a 5-inch strip of wood on the front edge of the top to stiffen them.

## WINTER SHELTER FOR DUCKS

Breeding Fowls Must Be Furnished With Some Protection Against Cold Rains and Snow.

Although adult ducks are so well protected by their feathers that they can stand a great deal of dry cold weather, the breeding birds must be furnished protection from the cold winter rains and snows and they must have a dry floor on which to roost. Therefore a suitable shed or building should be made available for the fowls before the coming of winter. The building may be quite simple in construction and much less expensive than one for hens.

## BLACKHEAD IS MOST DEADLY

Cases of Infection Are Few Where Turkeys Are Given Free Range at All Seasons.

Of the infectious diseases of turkeys, blackhead is the most destructive. It is notable that whenever the climate and range conditions are such as to permit of the turkeys foraging for most of their feed from the time they are hatched until they are marketed, cases of blackhead are infrequent. No positive cure for blackhead has been found, but free range and care not to overfeed are very important factors in raising turkeys successfully.

## COWPEA HAY BEST FOR COWS

Crop Has but Little Standing in City Markets on Account of Difficulty in Curing.

Cowpea hay is sold by specialists of the United States Department of Agriculture to be better suited for feeding to cows than to horses. Partly on this account and partly because of the difficulty often experienced in properly curing the large growth of succulent vines and its coarseness and unevenness in quality, cowpea hay has but little standing in the city markets.

## MAKE WAR ON TUBERCULOSIS

Tendency to Eradicate Disease in Areas Containing Many Farms Is Latest Development.

A noteworthy development in bovine tuberculosis eradication is the tendency to free from that disease areas containing many farms. The annual report of the bureau of animal industry, United States Department of Agriculture, just issued, lists the following reasons, which made tuberculosis tests of all cattle within their boundaries during the last fiscal year: Clay county, Mississippi; Island county, Washington; Clatsop county, Oregon; and the District of Columbia. Department officials believe that eradication of tuberculosis will proceed more rapidly, even than in the past, when it is taken up on the area basis.

## EXCELLENT FEED FOR SHEEP

Silage Made From Corn on Which Grain Is Just Beginning to Harden Is First-Class.

Finely cut silage, made from corn on which the grain is beginning to harden, is first-class sheep feed, and may be fed in limited quantities with the best of success. About a pound and a half to three pounds daily to a ewe weighing around 150 pounds will supply about the correct amount of silage. At no time should you attempt to feed silage spoiled in the least, or of inferior quality.

## SOY BEANS RANK VERY HIGH

Practical Value as Forage and Grain Warrants Much Greater Use, Says Ohio Station.

Soy beans rank very high in feeding value. According to the Ohio station 20 bushels of soy beans will carry 40 per cent more protein and 25 per cent more fat than 50 bushels of corn, or 30 per cent more protein and 65 per cent more fat than two tons of clover hay. The practical value of soy bean forage as well as grain warrants a much greater use of the crop.

## No Use to Lock the Stable After the Horse Has Been Stolen

Insurance won't do you any good if you wait until after the fire to take out a policy.

The only SAFE time to insure is TODAY.

## Every Drop an Asset

AS a dairy farmer you can figure out to the penny what your cream is worth. You know that every particle of butter fat has a distinct value to you. You cannot afford to use a separator that misses any cream.

The Primrose Cream Separator gets every drop of cream. The principle on which it operates is as simple as the mechanism. The frame is open and sanitary—the supply can large and low. Every bearing and quiet gear is well oiled by a splash system.

In Primrose separators, good workmanship and materials, close skimming and durable qualities, are the distinguishing points.

No matter what the size of your herd, the Primrose is a money-maker. Two-or-three-cow farmers use them with profit.

The Primrose is the only cream separator that automatically drains out the used oil from the gear case when new oil is added.

Let us demonstrate this and other points. If it is not convenient for you to call, phone us and we will bring a machine out and show you how it operates and what its financial advantages are to you.
